

DefenAge Clinical Power Trio

DefenAge™'s Clinical Power Trio is a unique fourth generation stem cell skin-care, addressing up to 16 signs of skin aging in six weeks; clinical-study proven. The key ingredient, Age-Repair Defensins™, features a stand-alone natural mechanism of action, and has been named "the newest peptide on the market" and "one of the biggest breakthroughs in skincare". These peptides are synthetically produced and target dormant skin's master stem cells. Exclusively available in DefenAge.

Bodystudio ATBM with Aesthetics Software

The revolutionary Bodystudio ATBM for automated total body mapping keeps getting better and better. Now the additional FotoFinder aesthetics software allows for consistent before and after documentation of aesthetic treatments. Within minutes your staff can map an entire patient who comes in for total body mapping and then take brilliant, consistent before and afters of cosmetic treatments. The perfect all-in-one photo system for your office that covers all your imaging needs.

FotoFinder Systems: 888-501-0805 or visit www.fotofinder-systems.com

M22 ResurFX

The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient's skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiDry®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF treatments have been shown to be safe.

Thermi, LLC: 866-981-5017 or visit www.thermi.com

Phoenix CO₂

The Phoenix CO₂ is priced under \$30,000 and can be used to remove uneven pigmentation and reduce fine lines and coarse wrinkles. Depending on which hand-piece is attached, the Phoenix-15 can cut, coagulate and vaporize soft tissue. The Phoenix CO₂ features one of the largest scan patterns in the industry and can resurface both hands in under two minutes.

Oxygenetix

Oxygenetix is a breathable foundation / camouflage designed to help heal and conceal a wide variety of skin conditions. Founded in Beverly Hills, Calif., Oxygenetix is used daily on and off the set by Hollywood's elite. This post-procedure cover-up reduces and eliminates social downtime following aesthetic procedures – the main reason many patients choose not to proceed with laser, peel, needling or dermabrasion treatments – thereby increasing your consultation to procedure conversion rate.

Collagen P.I.N.

Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

Advice Media

Advice Media is a leader in online digital marketing for medical practices. We offer beautiful websites and proven marketing through SEO, social media, review management and paid search so that we are the last company you will need.

Advice Media: 800-260-9497 or visit www.AdviceMedia.com

Dermalinfusion

Dermalinfusion is an advanced skin resurfacing technology that combines exfoliation, extraction and infusion of condition-specific serums to improve skin health, function and appearance. A patented, non-invasive treatment, Dermalinfusion is fully customizable and the perfect solution to address a wide variety of skin concerns and conditions from head-to-toe and is suitable for all Fitzpatrick types. This high degree of customization results in skin that shows immediate and noticeable improvement in volume, hydration, tone and texture. Dermalinfusion is ideal when used in conjunction with other non and minimally invasive procedures to enhance results.

Epionce Anti-Aging Lip Renewal

Epionce Anti-Aging Lip Renewal incorporates therapeutic Epionce anti-inflammatory and barrier-repair renewal technology into an aesthetically elegant treatment moisturizer for the lips. Soft-focus technology diminishes the appearance of fine lines and wrinkles around the unique lip area to reveal noticeably smoother, more hydrated, youthful-looking lips. Ideal for daily use alone or as a primer under lipstick to enhance color longevity.

Episciences, Inc.: 866-EPIONCE (374-6623) or visit www.epionce.com

NANOPORE stylus 1

NANOPORE stylus 1 is the next generation in micro exfoliation technology, promoting skin health through a non-invasive proprietary dermatological device that offers a comprehensive solution for skin rejuvenation, allowing specialists to customize skincare to fit the needs of every patient. First, it removes superficial skin through superior exfoliation, removing dead cells; then, it micro exfoliates the stratum corneum, increasing the absorption of active cosmetic ingredients. Visibly aids in reducing the appearance of fine lines, photo-aging and pores. Also helps improve clarity, firmness and skin tone.

Rejuvn8

Polydioxanone (PDO) has been used for more than 20 years in pediatric cardiac surgery, plastic and orthopedic surgery. PDO threads have a high safety profile, complete absorption, and minimal tissue reaction. They are available in two forms: Smooth and Barbed. Smooth PDO threads support overlying skin and mechanically stimulate neocollagenesis with fibroblast migration and collagen production. Barbed threads stimulate neocollagenesis, lift and secure static sagging skin and are effective for facial and body lifting. Rejuvn8 non-surgical face-lifting techniques incorporate these threads. Our team travels to your office and trains you in a hands-on workshop. Once PDO threads are implemented in your practice, we are available to support you as your PDO experts.

NS-532 Laser System

The NS-532 Laser System is a compact, portable and affordable FDA cleared 532 nm laser system for the safe and effective treatment of pigmented and vascular lesions on all skin types. NewSurg offers honest value and generous trade-in credit for old Iridex, Laserscope and Pulsed Dye Lasers, towards the NS-532 Laser System. This system sets a new standard in the evolution of simple and efficient aesthetic laser treatments.

NewSurg: 215-822-7722
or visit www.NewSurg.com

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

BTL Industries: 866-285-1656 or visit www.btlaesthetics.com

ZWave

The Zimmer ZWave constitutes the latest development in the treatment of cellulite. The ZWave utilizes an electromagnetic generator to create a ballistic force that is transferred to the applicator. Utilizing soft pulse technology to enhance patient comfort, it delivers pulsed radial wave therapy to the treatment area. The ZWave is designed to temporarily reduce the appearance of cellulite. Average or typical patient treatment time is 15-30 minutes.

Zimmer MedizinSystems: 800-327-3576 or visit www.zimmerusa.com

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

Allofill

Allofill™ is an adipose-derived allograft filler that contains a wide array of native growth factors. Allofill is available in a ready to use, flowable format packaged in a 3 cc syringe. The product's proprietary processing allows for better preservation of native growth factors, providing a spectrum of available proteins, which result in improved remodeling characteristics during healing.

Biologica Technologies: 800-677-6610 or visit www.allofill.com

Verjú

Verjú is the first green laser to receive FDA market clearance for non-invasive fat loss. The Verjú has proven to do in weeks what others can only claim after months, and it is reportedly the only green body contouring device to be proven through a Level 1, multi-site, placebo controlled, double-blind study. The Verjú utilizes Erchonia's patented line generated low level lasers to target pockets of uneven fat in the thighs, buttocks and lower abdomen. Verjú is a pain free procedure and void of any harmful side effects.

Erchonia Corporation: 877-699-3766 or visit www.erchonia.com

Alma Harmony

Alma™ Harmony™ combines a full spectrum of aesthetic indications, advanced technologies and excellent clinical results to create complete aesthetic harmony. This system is upgradable and expandable, allowing you to specialize in any aesthetic segment and expand your clinical offerings as your practice grows. Alma Harmony offers powerful treatment solutions for six major indications: skin remodeling, vascular and pigmented lesions, tone and texture, hair removal, acne scars and tattoo removal simultaneously. Harmony XL Pro users are able to serve more skin types in a superior and often virtually painless way.

Alma Lasers: (866) 414-ALMA (2562) or visit www.almalasers.com

Bellafill

Bellafill® is the only dermal filler FDA approved for the correction of nasolabial folds and moderate to severe, atrophic, distensible facial acne scars on the cheek in patients over the age of 21 years. This smooth, collagen-based filler is comprised of 80% bovine collagen gel and 20% polymethylmethacrylate (PMMA) microspheres. The collagen immediately volumizes smile lines or atrophic acne scars, lifting them to the level of surrounding skin. The PMMA microspheres form a matrix that supports production of endogenous collagen, which replaces the injected collagen over time.
